PROFILE

Detail-oriented Information Technology student at President University specializing in Cyber Security, with a strong interest in system analysis, process mapping, and IT automation. Experienced in assessing manual workflows and translating them into digitized, automated web-based solutions. Proven track record in project coordination, and technical documentation. Eager to support continuous improvement and digitalization initiatives within IT & Operations.

EDUCATION

President University

Undergraduate *Sarjana Komputer (S.Kom)*,
Concentration in Cyber Security, GPA **3.89/4.00**
Activities : Mahasiswa Penggerak (Secretary 2)

Bekasi, West Java

Sep 2024 - Present

SMAN 1 Yogyakarta

IPA, Final Grade : 89.7/100
Activities : Nila Pangkaja Theatre (Head of Secretary)

Yogyakarta, DIY

July 2021 - May 2024

PROJECT

SRM-Audit Website

Feb 2026 - Mar 2026

Full-Stack Developer

- Analyzed and translated complex compliance regulations from the NIST Cybersecurity Framework (36 controls) and OWASP Top 10 into functional system requirements for a GRC platform.
- Designed core system logic and automated calculation engines for exposure metrics, CIA asset criticality, and risk-compliance scoring to optimize inefficient, legacy manual audit processes.
- Integrated AI-driven solutions using the Gemini API for automated executive summaries and utilized Dompdf for real-time risk matrix and compliance reporting.

Scholarship Management Website

Jan 2026 - May 2026

Back-End Developer

- Mapped out system architecture for a serverless backend environment (Express.js & Firebase) by enforcing strict business rules through Role-Based Access Control (RBAC) and data-ownership rules.

AI-Powered Worklog Management System

Jan 2026 - May 2026

Full-Stack Developer

- Applied comprehensive security including Helmet.js for HTTP headers, CORS configuration, and rate limiting for DDoS prevention and secure password.
- Protected sensitive data with environment variables and secure token management.
- Ensured reliable data flows through input validation and sanitization to mitigate SQL injection and XSS, while integrating frontend and backend APIs.

Biometric Auth Mobile

Feb 2026 - Feb 2026

Full-Stack Developer

- Developed a secure biometric authentication application in Flutter, integrating real-time camera previews with on-device face detection and ML inference pipelines.
- Enhanced data privacy by implementing cryptographic hashing and secure template storage within the authentication services.

LEADERSHIP ACTIVITIES

3rd Economic Survival Exhibition

July 2025 - July 2025

Secretary & Liaison Officer

- Handled administrative tasks and meeting documentation.
- Assisted as a Liaison Officer on the event day, providing direct support to the judges and ensuring a smooth event flow for over 2,000 attendees.

XPERTALKS 2025

Jan 2025 - July 2025

Head of Secretary

- Led and coordinated cross-divisional communications and administrative workflows for 5 career events with 250+ participants.

SKILLS & CERTIFICATES

- **IT & Operations:** System Analysis, Process Mapping, Automation & Digitalization Concepts, Continuous Improvement, Data Validation.
- **Software & Tools:** JavaScript, React, Firebase, SQL, NoSQL, Github, MS Office, PowerPoint, Burp Suite, OWASP ZAP, Nmap, Wireshark, Postman.
- **Soft Skills:** Analytical & Problem-Solving, Cross-Functional Communication, Coordination Skills, Technical Documentation.
- **Certificates :** Cloud Computing Training of AWS Cloud Practitioner Essentials, (Orbit Future Academy), Korea ASEAN Digital Academy, (Komdigi & NIPA).
- **Language:** Indonesia (Native); English(Intermediate)/TOEFL ITP(Score: 510)
